Meeting 9

Date: 2016-02-15 10:00	Moderator: Ivar
Location: Idegr11	Secretary: Jonathan
Attending: Simon, Ivar, Jonathan, Dennis, Richard(Skype)	
Absent:	

Minutes

- Status report
- Prasad meeting
- Backlog
- Gantt in todo/log
- DATx02-16-39 and handledarmöte
- Next meeting

Protocol

Status report

This week, start the backlog
Last week; the prototypes can be seen as a spike in the agile process

- Ivar
  LAN, looked at some algorithms and python
- Simon
  Submitted the planning report, read the opposing groups planning report, learnt javascript and implemented BFS in vis.js
- Dennis
  Continued with the planning report, implemented graph visualization in 3D, read the opposing groups planning report, looked at the possibility to use JSON as our markup.
- Jonathan
  Researched visualization of Conways GOL with state branching

- Richard
  Reporting and prototyping

Prasad meeting

Do we really need a Prasad meeting tomorrow? Probably not, as we lack clarity on what issues that we need help with right now. We'll mail him and ask.

Backlog

Focus on modular development, many small modules that can fail och succeed individually. Divide work on visualization and markup development. Finish some prototypes to decide some common ground on what the markup should do.

Gantt

Gantt schedule now resides in Todo/log

Tutor meeting (Planning Report)

Everyone will read the opposing groups report and bring their critique tomorrow.

Next meeting

9-11 Workshop, Tuesday
13-17 Workshop, Wednesday
Meeting 10 at 10 on Friday
