Meeting 5

Date: 2016-02-02 10:00	Moderator: Dennis
Location: 5211	Secretary: Jonathan
Attendance: Dennis, Jonathan, Johan, Simon, Richard, Ivar	

Minutes

- Status Report
- Vision and Uniqueness
- Handledartillfällen
- Project Planning & Scrum
- Next meeting

Protocol

Status Report

- Project
  - Mapping out our vision to our planning report
- Members
  - Dennis
    - Checked out Python Tutor; Tutor has a focus on code in Python where our uniqueness is on an interface to the visualisation.
  - Richard

- - - Checked out Animal Script; what we want to do, but it's hard to use and plain ugly. We need to create something that's easier to use.
    - Simon
      - Read http://docsdrive.com/pdfs/ansinet/itj/2011/485-498.pdf, the paper is initially good, but the application couldn't be found. May be a good starting point. Too deep and doesn't do abstractions.
    - Ivar
      - Back in Sweden since sunday, is up to date
    - Johan
      - Added availability under functional requirements. Researched a bit on tree drawing algorithms.
    - Jonathan

Vision and Uniqueness

Some of our bibliography is very much alike our vision. What is unique to this project?
- Uniqueness
  - We can use our solution as a debugger, in contrast to the focus of a lot of our research, with stepping capabilities.
  - Language-independance
- Vision
  - Creating a modular and easy to use data visualisation solution for visualising changes.
  - Unified interface
  - Package of useful visualizations
  - High requirements on usability
  - Accessible (web based)

Handledartillfällen

Talk Planning report issues with Prasad.

Project Planning

Tomorrow 10:00

Next meeting

Workshop Wednesday 3/2 2016 10:00
Friday 5/2 2016 10:00 KG35
